To work as a full stack developer building Web Applications

Eminence Organics is a skin care company that specializes in organic products. At Eminence I worked with Drupal 7 on their B2B platform. I spent much of my time extending Drupal 7's capabilities by contributing open source projects like [Pagetype](#) and [Drupal ORM](#). I was the lead designer and developer on their [Celebrity Love](#) page, helped to greatly improve their 404 UX and was the developer of some intranet projects. At Eminence I learned how to work with people from all different backgrounds, and how to provide them with the guidance they needed to make decisions for their website.

Forge and Smith
Web Developer
Oct 14th, 2016 - Jan 9th, 2017
ForgeAndSmith.com

Forge and Smith is a growing Web Development company. Their focus is to deliver fully customizable Wordpress websites to businesses around the Greater Vancouver area. At Forge I was part of their developer team. I spent most of my time developing solutions to client problems such as bug fixes or feature requests. I also spent time developing Wordpress templates for our clients. During my time at Forge and Smith I created a full WordPress website for the client [Loen & Company](#).

Chad Kamer
Freelance Project
Aug 23rd, 2017- Sept 7th, 2017
ChadKamer.com

Chad Kamer is a musical instructor who provides private lessons as a side business. I found Chad needed a simple, single-page portfolio that offered him freedom of customization. I used WordPress, allowing him to change out all content as he needed, and built in convenient support to display a few highlight tracks on his portfolio page.
